

Alert Logic Log Manager™

Log Management Made Easy

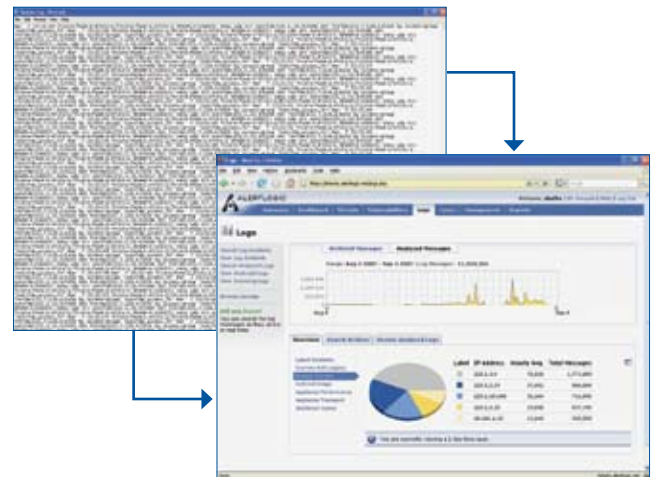

To comply with today's government and industry mandates, such as PCI, SOX, HIPAA, and GLBA log data must be collected, regularly reviewed, and archived. Regular analysis and forensics can also be performed on the same log data to enhance overall security and availability.

Manually reviewing even a single system or firewall log on a regular basis is a complex and time-consuming task—manually reviewing dozens, hundreds, or even thousands of distributed logs regularly is impossible. Most organizations simply do not have the resources for such an intensive review. But, the hassle and cost of purchasing and managing a log management infrastructure, including terabytes of storage, can be staggering, especially for mid-sized organizations.

Alert Logic's log management solution enables you to manage your log data in a revolutionary new way. Alert Logic Log Manager provides the first solution that leverages a cloud-based architecture to automatically collect, transmit, analyze, and archive log data from

across your organization. Our in-network appliance collects, aggregates and compresses the data, then all subsequent processing, analysis, reporting, forensics, and archival are performed in our highly secure and redundant datacenters.

Turn log data like this ...

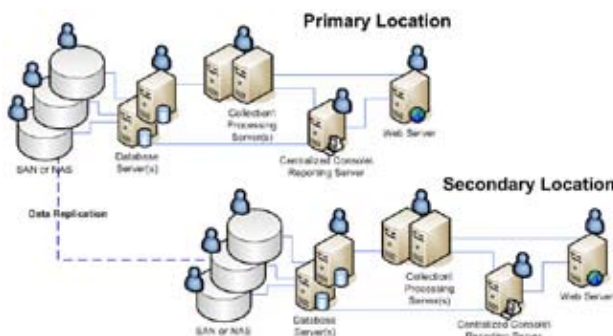

... into easy-to-analyze and search views like this.

Alert Logic Log Manager Makes it Easy

Instead of Deploying This

(Typical SIEM Architecture)

Deploy Only This

Alert Logic Log Manager™

No Hardware, No Software, No Database, No Storage, No Backups, and No Maintenance

Our cloud-based model is the picture of simplicity and efficiency. All solution capabilities are available from any browser. All configuration, tuning, maintenance, and solution upgrades are performed automatically and seamlessly. Simply put, Alert Logic Log Manager does it all for you so you can avoid the effort and cost associated with deploying and managing a log management system.

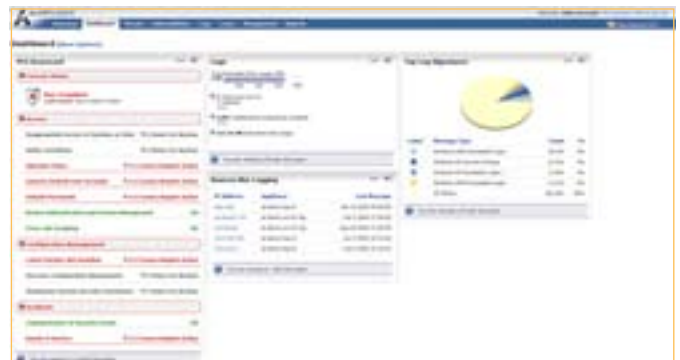

With years of experience and hundreds of satisfied customers, the Alert Logic cloud-based platform has radically simplified how to meet your compliance and security needs.

Key Benefits

- **Enables regulatory compliance** with automated log data collection and due diligence review as well as immutable, redundant, and secure archival.
- **Improves incident response and resolution** for security, performance, and availability incidents via quick and easy browser-based access to all historical log data.
- **Easy to buy, deploy, use, and own** with no software or hardware to purchase or maintain, no upfront investment required, everything included in one convenient monthly fee.

Key Solution Capabilities

1-click filtering
Straightforward data navigation
Automated thresholding and alerting
Automated data collection and archiving
Real-time data views
Customizable reporting
Fast and fully indexed archive searching
Customizable data retention policy
Fully redundant data archive
Encrypted and compressed log data transport
Single centralized view and management of all log data

Customizable dynamic dashboard
