RDP	7 hours	24 minutes

ASIA

10 MINUTES ON AVERAGE TO FIRST ATTACK

WEB	2 hours	9 minutes
EMAIL	5 hours	21 minutes
SSH	1 hour	51 minutes
RDP	6 hours	11 minutes

This map demonstrates how quickly cybercriminals seek out attack vectors within your systems. Within 24 hours of exposure to the Internet, it is likely that your systems have already been scanned and selected for further investigation by cybercrime groups. Mitigate your risk for attack by applying security best practices that include continuous monitoring of your networks and systems.
