

SOLUTION OVERVIEW:

ALERT LOGIC® FOR ISO 27001

WHAT IS ISO 27001?

Developed by the International Standards Organization (ISO), the ISO/IEC 27001 standard can help organizations assess their IT security maturity and improve the procedures used to protect sensitive data.

Alert Logic addresses a broad range of regulatory compliance requirements to help you prevent incidents, such as a data breach, that threaten the security, availability, integrity and privacy of customer data. Alert Logic connects a security platform, threat intelligence, and cybersecurity experts to provide the best level of security and compliance coverage your workloads require across any environment.

Alert Logic delivers a solution that provides asset discovery, vulnerability assessment, threat detection, and application security. Our solution can help you map to ISO 27001 requirements and quickly understand the state of compliance without hiring new staff. Our expert services augment your in-house security team by monitoring your workloads and environment 24/7. Analysts investigate alerts and contact you within 15 minutes if we detect suspicious activity such as: unauthorized access, exposure or modification of accounts, controls or configurations.

ADVANCE YOUR COMPLIANCE program in record time and quickly understand the state of compliance without hiring new staff.

REDUCE YOUR RISK with an improved security posture, reduced attack surface, and risk of data breach.

PROTECT CUSTOMER DATA from network and OWASP Top 10 attacks with web application scanning, a robust vulnerability library, and access to security consultants 24/7 to keep data safe.

PREPARE FOR AUDITS, ANYTIME with audit-ready reporting that helps IT staff stay one step ahead of requirements, mandates, and auditors.

FREE UP RESOURCES and implement compliance best practices with informed advice and remediation steps from our compliance experts.

Alert Logic maintains strict compliance with internal and external regulatory requirements for our IT operations and services, including: PCI DSS 3.2 Level 2 Audit, AICPA SOC 1 & 2 Audit, and ISO 27001-2013 certification.

ALERT LOGIC ISO 27001 SOLUTIONS MAPPING

ALERT LOGIC	NIST 800-171
<p>Alert Logic Essentials <i>Vulnerability & Asset Visibility</i></p> <ul style="list-style-type: none"> - Asset discovery - Vulnerability scanning - Cloud configuration checks - Extended Endpoint protection - Threat Risk Index - Compliance scanning and reporting 	<p>8.1 Responsibility for assets</p> <p>12.6 Technical vulnerability management</p> <p>12.2 Protection from malware</p>
<p>Alert Logic Professional Includes Essentials <i>24/7 Managed Threat Detection and Incident Management</i></p> <ul style="list-style-type: none"> - 24/7 Incident Monitoring & Management - Security Analytics & Threat Intelligence - Log Collection and Monitoring - Intrusion Detection - Security Event Insights and Analysis - Office 365 Log Collection & Search - Cloud Vendor Security Integrations - AWS User Behavior Anomaly Detection - Anti-Virus Integration 	<p>12.4 Logging and monitoring</p> <p>16.1 Management of information security incidents and improvements</p>
