

VISUALIZING

ALERT LOGIC™ MDR

Alert Logic's managed detection and response (MDR) solution delivers massive scale and integrated services that **discover** risks to the security of your business and **detects** breaches — reducing noise and false positives to enable rapid response.

We **assess** your security posture and **collect** data across all your systems to **analyze, prioritize** and **validate** threats before **escalating** only those that can impact your business — providing vital and actionable intelligence.

Coverage for Major Platforms & Services, INCLUDING:

Microsoft Azure

Google Cloud

Office 365

Okta

ASSESS

Alert Logic provides a comprehensive view and robust understanding of your unique security posture through reporting, dashboards, and expert services.
