ALERT LOGIC™

SOLUTION OVERVIEW

Alert Logic MDR Professional

Comprehensive protection for business-critical assets

Addressing threats is a moving target. Monitoring around the clock requires a 24/7 Security Operation Center (SOC), but creating your own can take years. High costs and staffing challenges mean that organizations struggle to identify, prioritize and respond to threats.

Alert Logic MDR Professional protects your business-critical assets with 24/7 threat detection and incident management with a 15-minute triage SLA, MDR Concierge support, vulnerability scanning, asset visibility, and endpoint detection. Our global SOC is staffed by over 150 experts in security and information technology disciplines. They combine the Alert Logic MDR platform and purpose-built SOC tooling with decades of experience.

ALERT LOGIC MDR PROFESSIONAL INCLUDES:

- White Glove Customer Experience
- 24/7 Threat Management
- 15-Minute Escalation SLA
- Named MDR Concierge
- Cloud Change Monitoring
- Real-time Reporting
- Intrusion Detection
- Anti-Virus Integration
- User Behavior Anomaly Detection (UBAD)
- Container Intrusion Detection
- File Integrity Monitoring
- Web Log Analytics
- Automated Response

With Alert Logic MDR Professional, You Receive

WHITE GLOVE EXPERIENCE

A key aspect of our White Glove Customer Experience is our team. The Alert Logic MDR Concierge Team is made up of experts dedicated to your success which include our SOC team, Customer Success Managers, Analysts, and Threat Researchers. At Alert Logic, we understand that threats can happen anytime and anywhere, which is why our team works around the clock, continuously monitoring and identifying threats to give you peace of mind.

EMERGING THREAT RESPONSE

Alert Logic's MDR platform gives our security experts an unparalleled view of attacker behavior across hundreds of thousands of systems. Threat researchers work with this data and intelligence gathered from the security community and industry feeds to identify emerging threats that can affect our customers.

The experts in our security operations center use threat hunting methods to search through massive data sets to identify customers who can be affected by these threats, and alert them to vulnerable systems and work with them to stop attacks before they happen. With hundreds of new vulnerabilities discovered every week, this capability, combined with detection of well-known and established threats, is critical to protect your organization.

INTELLIGENT RESPONSE™

Intelligent response is vital for relieving IT and security departments of repetitive response tasks and minimizing the need for constant administration. Alert Logic provides all of the essential elements of intelligent response: multiple user experiences, recognition of risk profiles, broad coverage of sources, advanced detection capabilities, options for levels of automation, the ability to initiate actions, and a growing range of use cases.
