

# SOC 2

## PRIORITIES FOR SOC 2 COMPLIANCE PREPAREDNESS

Developed by the American Institute of CPAs (AICPA), Service Organization Control (SOC) 2 defines criteria for managing customer data based on five trust service principles:

**SECURITY | AVAILABILITY | PROCESSING INTEGRITY | CONFIDENTIALITY | PRIVACY**

SOC 2 certification is issued by outside auditors who perform auditing procedures on service providers to ensure they securely manage data to protect the interests of their customers. Mishandled data can leave organizations vulnerable to attacks, such as data theft, extortion and malware installation. For security-conscious businesses, SOC 2 compliance should be a minimal requirement when considering application and network security providers.

**ENSURE YOU HAVE THE EXPERTISE** or the dedicated staff required to keep pace

**MAINTAIN SECURE** systems, applications and an information security policy

**69%**

of respondents say their security teams are understaffed.

*ISACA State of Cybersecurity 2019*

**\$7m**

average cost of a single breach in the U.S.

*Ponemon Institute, the 13th-annual Cost of Data Breach Study*

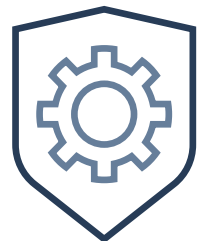

**IDENTIFY THE SAFEGUARDS** for administrative and technical security

- Detect and prevent network intrusions
- Identify vulnerabilities and misconfigurations that might expose customer data
- Find suspicious- or active-breach activity

**DEPLOY AUTOMATED SECURITY CONTROLS**

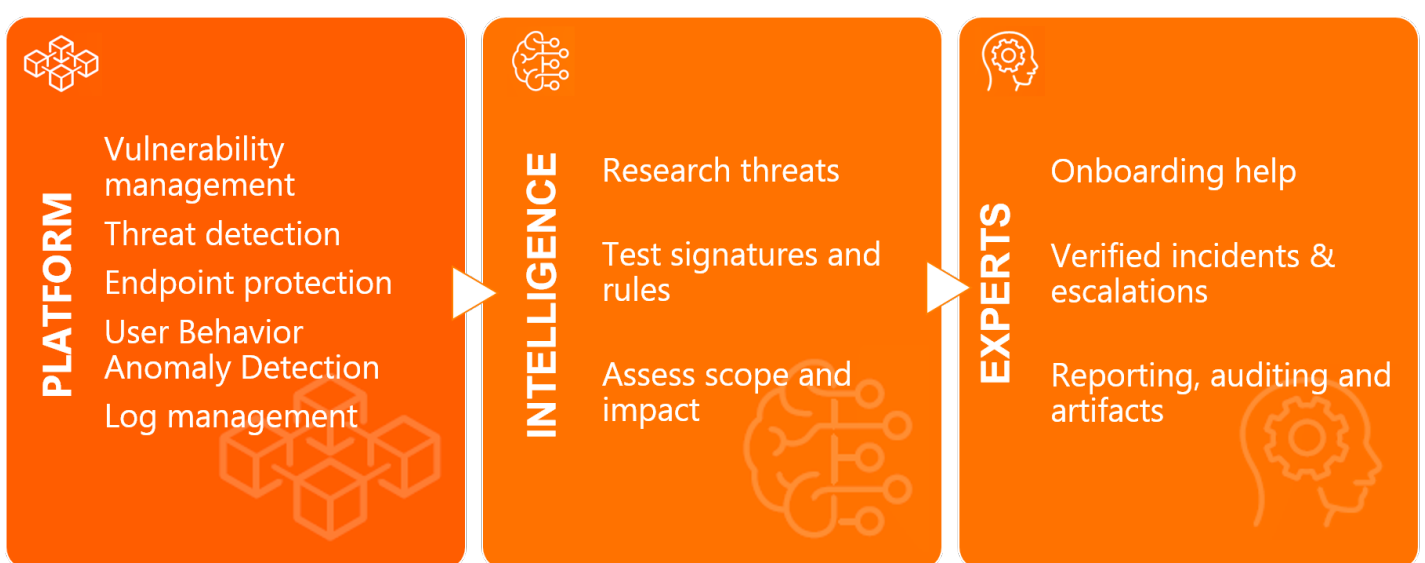

**TO** streamline assessment and detection of vulnerabilities and suspicious behavior

**OFFLOAD THE DAILY TASKS** related to meeting the SOC 2 requirements onto security experts

### CONNECT PLATFORM, THREAT INTELLIGENCE, AND EXPERT CAPABILITIES

to deliver optimal coverage across your environments.

### SUCCESSFUL SOC 2 COMPLIANCE PROGRAM USING ALERT LOGIC RESULTS

1. **ADVANCE** your SOC 2 compliance program in record time and quickly understand your state of compliance without hiring new staff.
2. **REDUCE** your risk with an improved security posture, reduced attack surface and risk of data breach.
3. **PROTECT** customer data from network and OWASP Top 10 attacks with web application scanning, a robust vulnerability library, and access to experts 24/7 to keep data safe.
4. **PREPARE** for audits, anytime with audit preparedness reporting that helps IT staff stay one step ahead of requirements, mandates and auditors.
5. **FREE UP RESOURCES** and implement compliance best practices with informed advice and remediation steps from our compliance experts.
