

SOLUTION BRIEF

Cloud Security

Cloud migration shows no signs of slowing down. As organizations continue to migrate their workloads to the cloud, 81%¹ of have chosen a strategy of running their operations on multiple cloud service providers. Some of the reasons for a multi-cloud strategy include reducing risk from Distributed Denial of Services (DDoS) attacks, removing single points of failure, and workload optimization. Organizations also are adopting a multi-cloud strategy to attract and retain top talent which allows employees to work on interesting innovate projects using their specific platform expertise. For all the benefits of a multi-cloud there are security implications to consider as the organization now has an increased attack surface.

Protecting The Cloud Has Unique Challenges

Protecting the cloud has unique challenges as there are workloads running on infrastructure that you don't control but you are still responsible for their security. A recent study reveals 66%² of respondents claim existing tools have limited to poor cloud security features forcing organization to invest in yet another security tool in order to gain proper visibility to cloud infrastructure and misconfiguration threats. This creates additional complexity and adds additional burden for organizations to get their staff up to speed on both the tool as well as protecting cloud platforms.

81%

Public cloud users that use two or more cloud service platforms.

Alert Logic Helps Secure The Cloud

Alert Logic provides a managed solution by combining platform, intelligence, and cloud expertise to help organizations protect their cloud, on-premise, or hybrid environment. With over a decade of experience we are one of the pioneers of protecting the cloud and we do this by leveraging the security frameworks of cloud providers and providing a holistic view of the entire attack surface across hybrid environment.

With nearly two decades of experience providing Security Operations to thousands of organizations, Alert Logic provides 24/7 peace of mind to our customers. Alert Logic provides the expertise our customers need to identify threats and respond more quickly.

- Cutting-edge threat intelligence and research maintain pace with the threat landscape.
- Expert security specialists place threats into context and verify incidents so that you can focus on what matters to your business
- Access to an industry-leading and always up-to-date security platform
- Security guidance and recommendations 24/7

Let Alert Logic Help Secure Your Cloud Journey.
